Key
[Key field with copy icon]

Secret
[Secret field with copy icon]

Save your secret!
You will only see this secret once! Make sure to copy and store your secret on a secure place.

[Close]

3. Ensure and double check the key and secret paste to X1/X2 correctly and Next

A screenshot of the THEOlive interface. At the top, there is a 'Back' button and the title 'THEOlive'. Below this, there are two input fields: 'Key' and 'Secret'. Both fields contain masked text (dots) and have a '填充' (Fill) button and an eye icon to the right. At the bottom of the screen, there is a 'Next' button.

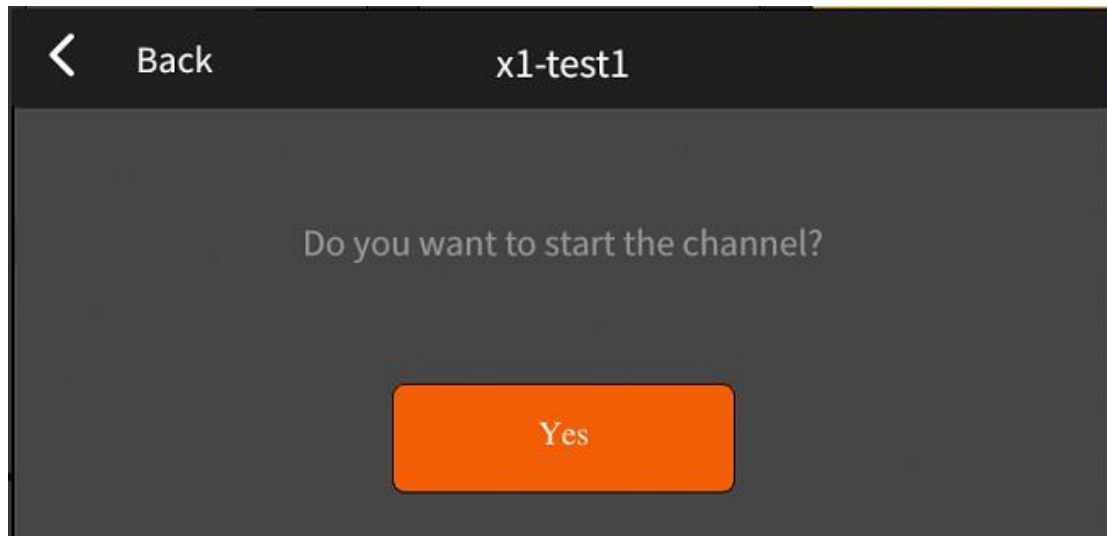

4. Create channels on X1/X2

A screenshot of the 'Create Channel' form in THEOlive. The form has a 'Back' button and a checkmark icon in an orange box at the top right. The fields are as follows:
- Name: A text input field containing 'test1'.
- Region: A dropdown menu showing 'us-east'.
- Stream configuration section:
 - ABR (Adaptive bitrate): A toggle switch set to 'ON'.
 - DRM: A toggle switch set to 'OFF'.
 - Max bitrate: A dropdown menu showing '8 Mbps'.
 - Max resolution: A dropdown menu showing '1080p'.
 - Fps: A dropdown menu showing '60 fps'.
- Another 'Stream configuration' section:
 - Auto-stop channel: A toggle switch set to 'ON'.

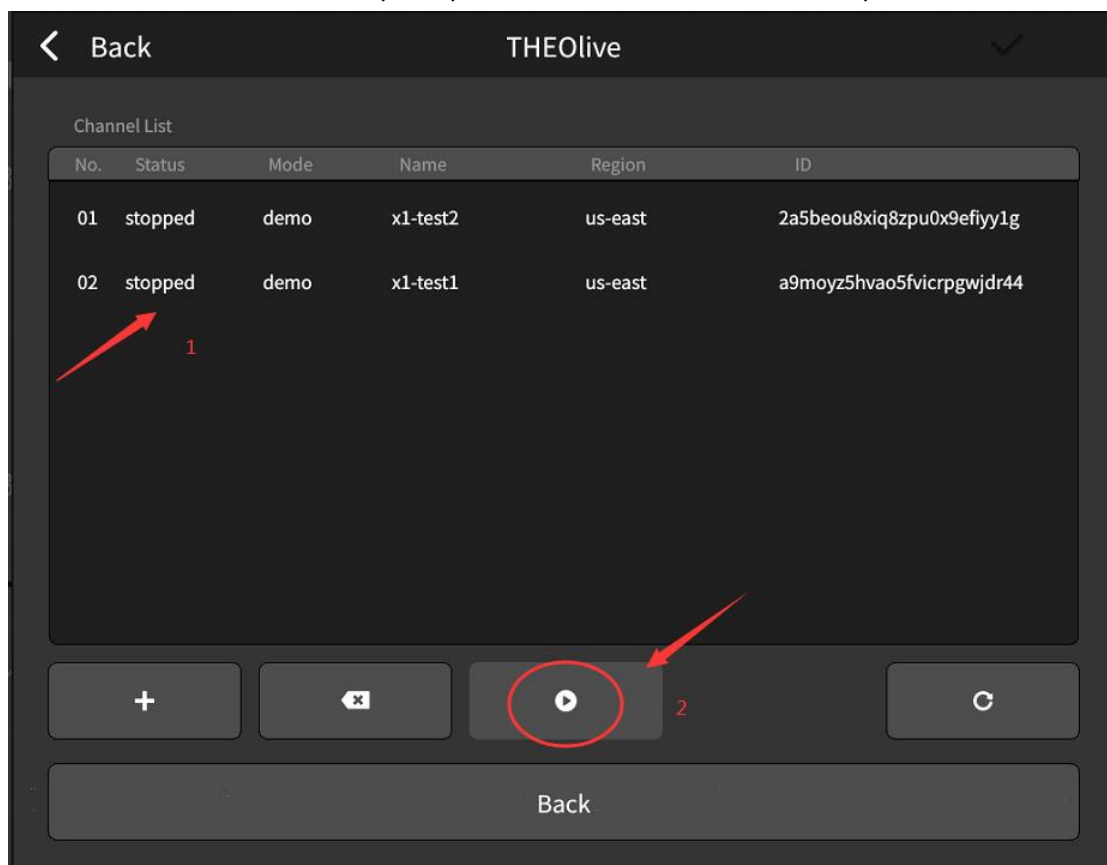

The channels created by THEOlive website will be synchronized to X1/X2, and similarly, the channels created by X1/X2 will also be synchronized to THEOlive website

5. Check channel status and Enable channels

After channel created, it will ask you if you want to start the channel directly

Or you can check the channel list and select the channel you would like to enable

6. After channel starting, enable THEOlive and start streaming in main screen
